

Pediatric Injury Research Training Program

Interdisciplinary postdoctoral research training for the next generation of injury control specialists.

Fellowship Applications Now Being Accepted

The goal of the Pediatric Injury Research Training Program is to create and sustain a corps of interdisciplinary-trained investigators who will conduct rigorous research on ways to reduce the toll from injuries. This two-year postdoctoral fellowship focuses heavily on research methodology and faculty mentorship, and it is part of the University of Washington's Harborview Injury Prevention and Research Center in Seattle, WA.

We are recruiting outstanding fellows from a national applicant pool with attention to diversity in clinical and academic backgrounds, socioeconomic status, race, ethnicity and gender.

Requirements:

- Must have completed a Ph.D. or M.D. or equivalent.
- Must be a U.S. citizen, non-citizen national, or permanent resident.
- Must be able to commit full-time professional effort.
- We encourage applications from a variety of medical and academic fields.

Deadlines:

- **Physicians and clinical PhDs** – November 15, 2017
- **Non-clinical PhDs** – December 1, 2017
