- <https://hiprc.org/3interventionstoolkit/> Harborview Injury Prevention & Research Center's Firearm Injury & Policy Research Program (FIPRP) has created a new interactive toolkit on firearm injury and suicide prevention strategies. FIPRP's mission is to reduce the impact of firearm injury and death on people's lives through research and collaboration.
  - The interactive toolkit details three interventions available to protect yourself and loved ones from firearm injury or suicide:
    - Firearm Safe Storage provides an effective way to keep you and your family safe. The toolkit includes an interactive map made to help people in crisis identify temporary firearm storage options outside the home.
    - Extreme Risk Protection Orders (ERPOs) allow families or law enforcement to petition a judge to restrict individual possession and purchase of firearms using a civil order.
    - Voluntary Waiver of Firearm Rights (Voluntary Do-Not-Sell) let people voluntarily and confidentially restrict immediate access to firearm purchase.
  - Spanish materials are available for download here:

- [This spreadsheet](#) has info on all the pending state child access prevention and safe storage-related bills—good or bad—that we've tracked this year. Only one relatively modest bill in this list has passed out of a committee at this point (NC HB 427, row 24 in

the sheet), so our folks expect that most of these others aren't really moving at all either.
